SUBJECT INDEX

Acetobacter suboxydans, growth, 75
Activated sludge, kinetics of, 179
Aeration, rates, 285
Algae, effects of mercury on growth, 93
  growth kinetics, 819
Asparaginase, microencapsulated, 663
Aspergillus clavatus, nucleoside synthesis by, 861
BHK 21 cells, submerged cultivation, 437
Candida lipolytica, RNA, 103
Candida utilis, linear growth in, 851
Catalase, immobilized, 201
Cell concentration, determination, 273
  in hydrocarbon fermentations, 267, 609
Cell cultivation, 437, 499, 753
Cell growth, mechanism of, 411
Cellulose, activation, 1039
Chlorella pyrenoidosa, growth kinetics, 819
Continuous processes, 123, 207
  gramicidin S production, 151
  lactic acid production, 233
  protease production, 647
  xanthan production, 23
Cyanogen bromide, activation of cellulose, 1039
Detergents, nonionic, effect on lysozyme activity, 737
Enzymes, immobilized, 201, 281, 473, 509, 629, 637, 663, 715, 847, 975, 1027, 1031
  ,diffusion in, 675, 871
  ,inactivation of, 201, 473, 871
Enzymes, inducible formation, 811
Enzyme production, proteases, 647
Escherichia coli, transfer nucleic acids of, 617
Fermentation processes, solid media, 517
  optimization, 857
Fermentors, continuous, 279, 939
  ,chemostat, 75, 391, 915, 1045
  pilot plant, 679
Flow rate, control, 291, 1045
Fructose (5-keto-D-), from sorbose, 843
Gluconobacter melanogenous, fermentation of sorbose by, 799, 811, 1035
Glucose isomerase, immobilized, 509
Glucose oxidase, immobilized, 975
Gramicidin S, continuous production, 151
Gulonic acid (2-keto-L-), from sorbose, 811, 1035
Hydrocarbon concentration, determination of, 267
Hydrocarbon droplets, entrainment, 1
  interfacial areas, 345
  size distribution, 43
Hydrocarbon fermentations, 1, 43, 61, 267, 295, 297, 309, 319, 331, 345, 361, 379, 609
  growth models for, 533, 571, 587
Hydrogenomonas eutropha, utilization of organic nitrogen, 985
Inhibition, substrate, 939
Invertase, immobilized, 637
Isolation and purification, bacterial proteases, 685
  nucleic acids, 617
Kerosene, microbial utilization, 379
Kinetics, activated sludge, 179
  algal growth, 819
  enzyme reactors, 885
  lactic acid production, 233.
  microbial growth, 61, 411, 533, 571, 587, 787, 851, 915
  protein release from cells, 33

Lactase, immobilized, 629
Lactic acid, production, 233
Leaching, microbial, 777
Level control, continuous fermentors, 279
Lysozyme, activity, 737
Mercury, effect on algal growth, 93
Mixed populations, kinetics of, 179, 207, 391
Modeling, mathematical, 13, 207, 533, 571, 587, 787, 939
Nitrogen, organic, microbial utilization, 985
Nucleic acids, single-cell protein, 103, 173, 447
  transfer, purification of, 617
  yeast, 103, 173
Nucleoside monophosphates, large-scale synthesis of, 861
Oils, fuel, emulsification and degradation, 331
  metal cutting, microbial protein from, 361
  residual, microbial degradation, 295, 297, 309, 319, 331, 361
Optimization, fermentation processes, 857
Oxygen, dissolved, 285
  ,control of, 493, 499
  effect on microbial growth, 787
  supply, in submerged cultivation, 437
Papain, immobilized, 281
Petroleum, degradation and mineralization in sea water, 297, 309, 319, 331
Piping, for pilot-plant fermentors, 679
Pronase, immobilized, 1031
Proteases, continuous production, 647
  from bacteria, 685
  immobilized, 1027
Protein, release from cells, 33, 725
  single-cell, fiber formation, 1047
  ,nucleic acids, 103, 173
  ,production from residual oils, 361
Pseudomonas fluorescens, continuous cultivation, 123
Pullulanase, immobilized, 715
Reactors, biochemical and biological, 1, 13, 253, 285, 885
  enzyme, 201, 885
Respiration rate, measurement, 499
RNA, degrading enzymes, 103
Rubella, replication, 493
Saccharomyces carlsbergensis, growth, 75
Saccharomyces cerevisiae, development, 1007
Scale-up, biological reactors, 253
Schizosaccharomyces pombe, population models, 915
Solid state fermentations, 517
Sorbose, conversion of, 799, 811, 843
Sound waves, for cell disruption, 33
Starch, anthranilates, 281
Sterilization, electrohydraulic, 459
Steroids, conversion, pilot-plant, 831
Tissue culture, 437, 499, 505, 753
Xanthan, production, 23
Yeast, cell disruption, sound waves, 33
  ,agitation mill, 725
  growth on hydrocarbons, 345
  nucleic acids, 103, 173
Zinc sulfide, microbial leaching, 777

BIOTECHNOLOGY AND BIOENGINEERING,
VOL. XIV, ISSUE 6 (1972)

ACKNOWLEDGMENT

The Editor and the Editorial Board gratefully acknowledge the contributions of the following reviewers in the preparation of this volume:

The following is a list of stockholders owning or holding 1% or more of John Wiley & Sons, Inc. stock as of September 24, 1972:
Cynthia W. Darby, Box 651, Bridgehampton, New York 11932; John P. Gilbert, exec. of estate of Julia Wiley Gilbert, c/o Wells Fargo Bank, Trust Division 37165, P.O. Box 3820, San Francisco, California 94120; Edward P. Hamilton, 605 Third Avenue, New York, New York 10016; W. Bradford Wiley & Francis Lobdell, Trustees, Elizabeth W. Hamilton Trust, 605 Third Avenue, New York, New York 10016; Edward P. Hamilton, Trustee under will of Elizabeth Wiley Hamilton, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York 10005; I. M. Kolthoff, University of Minnesota, School of Chemistry, Minneapolis, Minnesota; Eric S. Proskauer & Charles H. Lieb. Trustees, u/a by Jenny R. Proskauer, 220 Central Park South, New York, New York 10019; Francis Lobdell & William J. Seawright, Trustees, f/b/o Deborah Elizabeth Wiley, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York; Cynthia W. Darby & Julia Gilbert, Trustees under will of Kate R. Q. Wiley, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York; Francis Lobell & William J. Seawright, Trustees, f/b/o Peter Booth Wiley, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York; Francis Lobdell & William J. Seawright, Trustees, f/b/o William Bradford Wiley II, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York; Edward P. Hamilton & Cynthia Wiley Darby, Trustees under will of William O. Wiley, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York; Adele E. Windheim, 8 Dundee Road, Larchmont, New York; Cede & Company, Stock Clearing Corporation, 44 Broad Street, New York, New York; Cudd & Company, 1 Chase Manhattan Plaza, New York, New York; Dif & Company, P.O. Box 1447, 135 Devonshire Street, Boston, Massachusetts; W. Bradford Wiley & E. P. Hamilton, Trustees for Edward P. Hamilton Foundation, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York; Palico, c/o Riggs National Trust Department, Washington, D.C.; Salkeld & Company, c/o Bankers Trust, P.O. Box 704, Church Street Station, New York, New York; Sigler & Company, c/o Manufacturers Hanover Trust Company, New York, New York, 10015; Trussal & Company, National Bank of Detroit, c/o Trust Department, Detroit, Michigan; Lane & Company, Southern California First National Bank, c/o Trust Department, San Diego, California 92112; Pitt & Company, P.O. Box 2444, Church Street Station, New York, New York.
8. Known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities: None
9. For optional completion by publishers mailing at the regular rates (Section 132.121 Postal Service Manual)
39 U.S.C. 3626 provides in pertinent part: "No person who would have been entitled to mail matter under former section 4359 of this title shall mail such matter at the rates provided under this subsection unless he files annually with the Postal Service a written request for permission to mail matter at such rates." In accordance with the provisions of this statute, I hereby request permission to mail the publication named in item 1 at the reduced postage rates presently authorized by 39 U.S.C. 3626.
(Signature and title of editor, publisher, business manager, or owner) Michael Harris, Vice-President
10. Not applicable.
11. Extent and nature of Circulation

	Average no. copies each issue during preceding 12 months	Actual number of copies of single issue published nearest to filing date
A. Total no. copies printed (*Net Press Run*)	1700	1700
B. Paid circulation		
1. Sales through dealers and carriers, street vendors and counter sales	—	—
2. Mail subscriptions	1382	1382
C. Total paid circulation	1382	1382
D. Free distribution by mail, carrier or other means		
1. Samples, complimentary, and other free copies	32	32
2. Copies distributed to news agents, but not sold	—	—
E. Total distribution (*sum of C and D*)	1414	1414
F. Office use, left-over, unaccounted, spoiled after printing	286	286
G. Total (*sum of E & F—should equal net press run shown in A*)	1700	1700

(*Signature of editor, publisher, business manager, or owner*)

I certify that the statements made by me above are correct and complete. MICHAEL HARRIS

Biotechnology and Bioengineering

CONTENTS

Vol. XIV, Nos. 1–6, 1972

ISSUE NO. 1, JANUARY

G. HAMER: Discussion on Entrained Droplets in Fermenters Used for the Cultivation of Single-Celled Microorganisms 1
S. D. WEINRICH and L. LAPIDUS: Parameter Adaptation and Control in a Biochemical Reactor 13
R. W. SILMAN and P. ROGOVIN: Continuous Fermentation to Produce Xanthan Biopolymer: Effect of Dilution Rate 23
C. J. JAMES, W. T. COAKLEY, and D. E. HUGHES: Kinetics of Protein Release from Yeast Sonicated in Batch and Flow Systems at 20 kHz .. 33
P. A. SANCHEZ PODLECH and W. BORZANI: Oil Drop Size Distribution in Hydrocarbon–Water Systems 43
M. CHAKRAVARTY, P. M. AMIN, H. D. SINGH, J. D. BARUAH, and M. S. IYENGAR: A Kinetic Model for Microbial Growth on Solid Hydrocarbons 61
C.-C. CHAO and P. J. REILLY: Symbiotic Growth of *Acetobacter suboxydans* and *Saccharomyces carlsbergensis* in a Chemostat 75
P. J. HANNAN and C. PATOUILLET: Effect of Mercury on Algal Growth Rates 93
A. IMADA, A. J. SINSKEY, and S. R. TANNENBAUM: Degradation of Ribonucleic Acid in *Candida lipolytica:* Extraction of Ribonucleic Acid Degrading Enzymes 103
V. H. EDWARDS, J. E. KINSELLA, and D. B. SHOLITON: Continuous Culture of *Pseudomonas fluorescens* with Sodium Maleate as a Carbon Source 123
Information for Contributors 149

ISSUE NO. 2, MARCH

H. W. BLANCH and P. L. ROGERS: Optimal Conditions for Gramicidin S Production in Continuous Culture 151
A. CANEPA, M. PIEBER, C. ROMERO, and J. C. TOHA: A Method for Large Reduction of the Nucleic Acid Content of Yeast 173
S. Y. CHIU, L. T. FAN, I. C. KAO, and L. E. ERICKSON: Kinetic Behavior of Mixed Populations of Activated Sludge 179
S. P. O'NEILL: Inactivation of Immobilized Catalase by Hydrogen Peroxide in Continuous Reactors 201
S. Y. CHIU, L. E. ERICKSON, L. T. FAN, and I. C. KAO: Kinetic Model Identification in Mixed Populations Using Continuous Culture Data 207

T. P. Hanson and G. T. Tsao: Kinetic Studies of the Lactic Acid Fermentation in Batch and Continuous Cultures 233
J. A. Howell, C. T. Chi, and U. Pawlowsky: Effect of Wall Growth on Scale-Up Problems and Dynamic Operating Characteristics of the Biological Reactor 253

Communications to the Editor

R. Manfredini and D. I. C. Wang: Simple Method for Determining Cell and Hydrocarbon Concentration During Fermentation 267
W. Borzani, E. W. Leser, C. M. S. Venosa, and V. M. N. C. Martins: Sieving Method for the Determination of Mold Concentration in Heterogeneous Culture Media 273
W. Borzani and M. L. R. Vairo: A Simple Device for Level Control Improvement in Small-Scale Continuous Fermenters 279
C. L. Mehltretter and F. B. Weakley: Preparation of Insoluble Papain through Cyanoethylated Starch Anthranilates 281
V. Linek: Determination of Aeration Capacity of Mechanically Agitated Vessels by a Fast Response Oxygen Probe 285
H. R. Bungay, III: Proportional Controller for Flow Rate 291
Information for Contributors 293

Issue No. 3, May

Symposium on Microbial Degradation of Residual Oils

R. L. Raymond: Introduction 295
R. M. Atlas and R. Bartha: Degradation and Mineralization of Petroleum by Two Bacteria Isolated from Coastal Waters 297
R. M. Atlas and R. Bartha: Degradation and Mineralization of Petroleum in Sea Water: Limitation by Nitrogen and Phosphorous 309
G. Soli and E. M. Bens: Bacteria which Attack Petroleum Hydrocarbons in a Saline Medium 319
J. E. Zajic and B. Supplisson: Emulsification and Degradation of "Bunker C" Fuel Oil by Microorganisms 331
D. I. C. Wang and A. Ochoa: Measurements on the Interfacial Areas of Hydrocarbon in Yeast Fermentations and Relationships to Specific Growth Rates 345
H. K. Speidel and E. O. Bennett: Conversion of Deteriorated Metal Cutting Fluids into Protein 361
E. Knetting and J. E. Zajic: Flocculant Production from Kerosene 379

C. P. L. Grady, Jr., L. J. Harlow, and R. R. Riesing: Effects of Growth Rate and Influent Substrate Concentration on Effluent Quality from Chemostats Containing Bacteria in Pure and Mixed Culture 391
F. H. Verhoff, K. R. Sundaresan, and M. W. Tenney: A Mechanism of Microbial Cell Growth 411
P. J. Radlett, R. C. Telling, J. P. Whitside, and M. A. Maskell: The Supply of Oxygen to Submerged Cultures of BHK 21 Cells 437

G. Hedenskog and L. Ebbinghaus: Reduction of the Nucleic Acid Content of Single-Cell Protein Concentrates 447
R. V. Holland, P. W. Board, and K. C. Richardson: Sterilization by Electrohydraulic Discharges 459
S. P. O'Neill: Thermal Inactivation of Immobilized Enzymes in Ideal Continuous Reactors 473

Communications to the Editor

D. G. Kilburn and A. L. van Wezel: Rubella Virus Replication at Controlled Dissolved Oxygen Tension 493
D. G. Kilburn and M. Morley: A Method for Controlling Dissolved Oxygen Tension and Measuring Respiration Rate in Suspension Cultures of Animal Cells 499
P. G. Probst, J. L. Rogers, and H. C. Orr: A "Cradle" for Support of Roller-Bottle-Cell Cultures During Microscopic Examinations 505
G. W. Strandberg and K. L. Smiley: Glucose Isomerase Covalently Bound to Porous Glass Beads 509
Erratum 515

Issue No. 4, July

C. W. Hesseltine: Solid State Fermentations (*Biotechnology Report*) 517
P. S. Shah, L. E. Erickson, L. T. Fan, and A. Prokop: Growth Models of Cultures with Two Liquid Phases. VI. Parameter Estimation and Statistical Analysis 533
A. Prokop and L. E. Erickson: Growth Models of Cultures with Two Liquid Phases. VII. Substrate Dissolved in Dispersed Phase; Effect of Dispersed Phase Volume and Temperature 571
A. Prokop, M. Ludvik, and L. E. Erickson: Growth Models of Cultures with Two Liquid Phases. VIII. Experimental Observations on Droplet Size and Interfacial Area 587
B. R. V. Concone, H. Hiss, M. del Pilar, G. Paz, C. G. Patricio, and W. Borzani: Measurement of Yeast Concentrations in Liquid Hydrocarbon Fermentations: Influence of Experimental Conditions and Statistical Significance of the Results Obtained 609
H. O. Weeren, A. D. Ryon, and A. D. Kelmers: Purification of Ten Transfer Ribonucleic Acids from *E. coli* K–12 MO 617
R. O. Stasiw, A. B. Patel, and H. D. Brown: Utilization of Bound Lactase in Clinical Chemistry 629
R. D. Mason and H. H. Weetall: Invertase Covalently Coupled to Porous Glass: Preparation and Characterization 637
D. E. Jensen: Continuous Production of Extracellular Protease by *Bacillus subtilis* in a Two-Stage Fermentor 647
T. Mori, T. Sato, Y. Matuo. T. Tosa, and I. Chibata: Preparation and Characteristics of Microcapsules Containing Asparaginase 663

Communications to the Editor

S. P. O'Neill: External Diffusional Resistance to Immobilized-Enzyme Catalysis 675
D. E. Brown and E. Gibson: Multiple Junctions in the Pipework of Pilot Plant Fermenters 679
Information for Contributors 683

Issue No. 5, September

M. H. J. Zuidweg, C. J. K. Bos, and H. van Welzen: Proteolytic Components of Alkaline Proteases of *Bacillus* Strains. Zymograms and Electrophoretic Isolation 685
K. Mårtensson and K. Mosbach: Covalent Coupling of Pullulanase to an Acrylic Copolymer Using a Water Soluble Carbodi-Imide 715
J. A. Currie, P. Dunnill, and M. D. Lilly: Release of Protein from Bakers' Yeast (*Saccharomyces cerevisiae*) by Disruption in an Industrial Agitator Mill 725
F. R. Bernath and W. R. Vieth: Lysozyme Activity in the Presence of Nonionic Detergent Micelles 737
G. G. Santero: The "Rotary Column" Method for Growth of Large-Scale Quantities of Cell Monolayers 753
